

Motorwerks BMW's Test Drive For The Cure Raises \$500

Motorwerks BMW donates to the Jane Brattain Breast Center every year by hosting a Test Drive for the Cure event during the month of October.

Jane Brattain is a longtime supporter of Park Nicollet and in 1991 they donated money to purchase a state-of-the-art biopsy machine.

Jane was actually the first person to use the new technology and discovered that she had breast cancer. She was able to discover it in time for early detection and is alive and well.

Jane is aunt to our employee, Tony Berg (Pre-Owned Client Advisor) and he was the one to connect us with the charity about 8 years ago
